

AFSAL MAJEED

IIT Hyderabad | Software Engineer — Backend & Applied ML
majeedafsali00@gmail.com | +91 8075134046 | Hyderabad, India | [LinkedIn](#) | [GitHub](#)

PROFILE

IIT Hyderabad graduate (B.Tech, Materials Science & Metallurgical Engineering) with hands-on backend development experience — RESTful APIs, workflow automation, and full-stack applications — plus applied ML and computer-vision project work. Currently combining a client-facing operations role in banking with continued software project work.

EDUCATION

Indian Institute of Technology (IIT) Hyderabad | *B.Tech, Materials Science & Metallurgical Engineering* 2022 – 2026
CGPA: 8.01

XII (CBSE) | *Placid Vidya Vihar* 2022

95.40%

X (ICSE) | *Mar Thoma Residential School, Thiruvalla* 2020

94.40%

SKILLS

- Programming Languages:** C, Python, Java, HTML, CSS, SQL
- Frameworks & Libraries:** FastAPI, Express.js, React, Node.js, PyTorch, Socket.io, OpenCV, NumPy
- Databases:** MongoDB, MySQL, TiDB
- Developer Tools:** Postman, Camunda BPM, Git, Docker

WORK EXPERIENCE

Manager, Private Banking | *ICICI Bank* Jun 2026 – Present

- Manage client-facing banking tools and relationships within the private banking segment.
- Provide basic technical troubleshooting and support for client-facing platforms.
- Built working knowledge of mortgage products, home loans, and banking channel strategy through internal training.

Backend Development Intern | *Mobius* Summer 2025

- Developed and maintained backend services for key enterprise projects.
- Built RESTful APIs and designed business process workflows.
- Used FastAPI for API development, Camunda BPM for workflow automation, and Postman for testing.

PROJECTS

Monocular Visual SLAM for Robot Localization & 3D Mapping

- Implemented a complete monocular visual SLAM pipeline for simultaneous localization and mapping using a single camera feed.
- Utilized ORB-SLAM3 for real-time feature extraction, pose estimation, and dense 3D point-cloud generation.
- Developed Python scripts with OpenCV to process video data and visualize the robot's estimated trajectory within the reconstructed 3D map.

GitHub Insight Service

- Built a Flask-based web application to scrape and analyze GitHub developer profiles.
- Utilized an LLM API to generate insightful summaries of developer skills and experience from GitHub activity.
- Technologies:** Python, Flask, LLM API, Web Scraping

Buzz Chat — Full-Stack Real-Time Chat Application

- Built a real-time chat application using the MERN stack and Socket.io.
- Implemented live, instant messaging with persistent chat history in MongoDB.
- Integrated Google OAuth for secure user authentication.

RELEVANT COURSEWORK

- Computer Science:** Introduction to Programming (C/C++, Python), Data Structures & Algorithms
- AI / ML:** Introduction to AI, Machine Learning in Chemistry, Computational Methods in Materials Science
- Cloud Development:** Google Cloud — Fundamentals, Infrastructure, Networking & Security, Secure Networking, Load Balancing
- Other:** Spoken Japanese, Introduction to Entrepreneurship, Communication Skills

POSITIONS OF RESPONSIBILITY

Cloud Coordinator, GDSC 2023 – 2024

- Organized the Google Cloud Study Jam, enabling peers to gain hands-on experience and cloud certifications.

Class Representative, MSME Batch 2024 – 2025

- Coordinated academic activities and represented student concerns effectively.

SCHOLASTIC ACHIEVEMENTS

- Secured Top 2% in JEE Main and JEE Advanced among all applicants.
- Secured KEAM (Kerala Entrance Exam) Rank 265 among 77,000+ applicants.
